

Nancy Microarchitecture:

- 35 registers each prefixed with 'r'
- Immediate, Register To Register, Syscall encodings.
- Starts in Operator mode, can be switched to User node.
- 64-bit addressing and 128-bit register size.
- Control register, Program counter, Stack pointer.
- Make some room for future iterations

Guidelines (for early stages):

- Easy to program for. (KISS)
- Easy to write checks for. (KISS)
- Easy to manufacture for. (KISS)
